Kits de maintenance

What is a Maintenance Kit?

Maintenance managers often have to juggle multiple suppliers to replace wear parts in their production lines, a time-consuming and complex task. To simplify this process, Aseptconn offers customized Maintenance Kits that include all the necessary parts for each of your skids. Fully tailored to your specific needs, these kits provide a practical and bespoke solution to optimize the maintenance of your installations.

Advantages

- A single supplier: Simplify your orders by dealing with just one point of contact for all your wear parts.
- A single reference: Easily place orders with just one number per kit, including all necessary materials.
- Optimized stock management: Reduce your stock levels with our tailored scheduled deliveries.
- Lower administrative costs: Cut your order management expenses, estimated at CHF 250.-, by consolidating all necessary materials into a single order.
- Simplified identification: Make product management easier with our precise and detailed labeling.
- Perfect traceability: Benefit from meticulous tracking through our advanced certificate management system.

With our Maintenance Kits, improve efficiency, lower costs, and simplify your operational management.

"Our product range for the pharmaceutical sector is almost unlimited—feel free to contact us."
