ASEPTCONN AG

Leak or contamination issues in your production facilities?

About us

Aseptconn is a leading supplier of components, products, software, and systems for sterile liquid technology, primarily in the pharmaceutical and biopharmaceutical sectors. With innovative products and expert advice, Aseptconn helps to sustainably improve its clients' processes. Its extensive portfolio and diverse services make it the preferred supplier for many renowned international pharmaceutical companies.

Service Description

Leaks and contaminations are among the main causes of production line shutdowns. For this reason, it is essential to implement preventive measures at each stage of the manufacturing process. At Aseptconn, we are committed to supporting you in this approach by offering a complete range of services and products tailored to your needs.

Leak or contamination problems.

Common production line issues

Did you know that maintenance teams frequently encounter five types of issues on production lines?
Here are the top 5 most common challenges:
n°1 : 54% of issues come from internal or external valve leaks.
n°2 : 22% are related to malfunctions in the Sterilization In Place (SIP) system or temperature probes.
n°3 : 12% are due to alignment, slope, or drainability issues, often caused by the assembly of components with Tri-Clamp connections.
n°4 : 6% are attributed to failures in steam traps and check valves.
n°5 : 6% result from problems with manholes and inspection windows.

What do we do?

Expert Advice
Production line design:

At this stage, the choice of products that will be part of the production line is crucial. That's why our experts are dedicated to offering you solutions, whether standard or customized, perfectly suited to your specific needs.

Training
Production line maintenance

The maintenance team faces numerous daily challenges. To assist them, we offer free training on best maintenance practices, in compliance with GMP standards, for both maintenance and production teams.

Solution
Leak and/or contamination issues:

Our experts intervene directly on-site to assess the leak or contamination and identify its cause. We then offer a tailored solution that meets your needs and quality requirements.
