Simplify your tasks

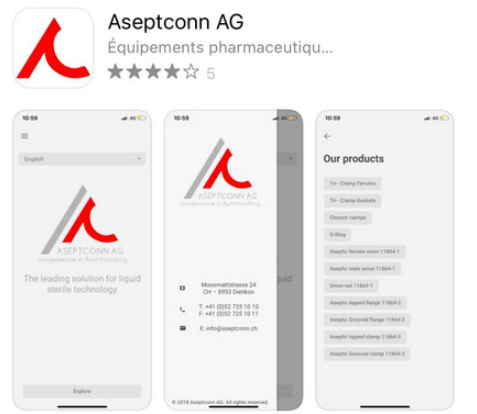

At Aseptconn, a supplier of components and products for sterile fluid transfer technology, you profit from our many years of experience in the Pharmaceutical sector.

We have developed a mobile APP that allows you to easily determine which standard is applied to your installation. Just use your phone and calliper and you will have the answer in seconds.

How to get the mobile app?

The app, which is completely free of charge, can be found in the APPLE STORE as well as on ANDROID under the name:

ASEPTCONN AG

How does it work?

The mobile application is easy to use:

1. Start the application and choose your preferred language
2. Choose the standard for the product that you would like information about.
3. Measure the diameters you have available according to the image you have on the application
4. Make a note of the dimensions obtained from the application
5. Your product will correspond to the standard that is closest to the measured values
