## Machining of Hastelloy, Duplex and 904L

We are pleased to introduce you to Aseptconn's unique capabilities in machining parts from cutting-edge metals such as Hastelloy, Duplex, Super Duplex and 904L. Our state-of-the-art workshop in Bulle enables us to offer high-precision machining solutions that meet the strictest standards of the pharmaceutical, biotech and chemical industries.

## Machining and welding of Hastelloy, Duplex and 904L

### Our services:

Machining of customized, tailor-made parts made of Hastelloy, Duplex, Super Duplex and 904L.

Production of critical components for the pharmaceutical, biotech and chemical industries.

Strict quality controls to ensure compliance with your quality standards.

Welding of the parts by our certified experts, who have extensive specialist knowledge of these materials.

### Specific stainless steels

Steel	Description
Hastelloy	Hastelloy alloys belong to the family of steels with high resistance to corrosion and aggressive environments. Choose Hastelloy if your application is exposed to strong acids, bases, chlorine solutions or other highly corrosive substances.
Duplex	Duplex stainless steels belong to a special family of stainless steels that combine both the austenitic and ferritic phases in their steel structure. If the application requires both excellent corrosion resistance and high mechanical strength, then duplex stainless steels are the right choice.
904L	904L stainless steel is an austenitic steel with high nickel and chromium content and low carbon content. Choose 904L steel if your application is exposed to acidic environments such as sulfuric acid and phosphoric acid. It is also a very easy to clean steel.

### Why should you choose us?

#### **Flexibilité et Réactivité:**

Our company has a high level of flexibility to meet the changing needs of our customers. We are responsive and able to meet tight deadlines.

#### **Technical expertise:**

Our highly qualified and experienced team excels in the processing of sensitive materials such as Hastelloy, Duplex, Super Duplex and 904L.

#### **State-of-the-art workshop:**

Aseptconn is proud of its state-of-the-art workshop in Bulle in the canton of Fribourg, which ensures an ideal working environment to meet the stringent requirements of the pharmaceutical, biotech and chemical industries.

#### **High-quality materials:**

We use only the highest quality materials to ensure strength, durability and compliance with pharmaceutical standards.

#### **Precision and reliability:**

Thanks to state-of-the-art equipment and strict manufacturing processes, we guarantee the precision and reliability of every machined part.

#### **Compliance with your standards:**

Aseptconn is committed to complying with all standards and regulations of the pharmaceutical industry to ensure the safety and quality of our products.

### Contact us today

Contact our expert team to discuss your machining, mechanical subcontracting or electrical discharge machining requirements. We will be happy to provide you with a customized quote and advise you on the best solutions for your project.
