PIPETITE®

Our Double Sided Pipetite® is now available to order

First installations have been completed with customers asking "*Why has this not been available before?*" and "*It's so simple to install*".

Multi Size Double Sided Pipetite® cut to size and installed

Before and after photos showing just how good they look!

BEFORE

AFTER

The multi size (25mm to 180mm), Double Sided Pipetite® is ideally suited to the many industries that use powders. This product prevents powders and liquids on the floor surface entering the room below, creates a seal around the exterior of the pipe, and also seals between a typical supporting floor flange and the floor surface itself. The Double Sided Pipetite® can be permanently attached to the floor using fixings if needed.

Another Pipetite® product to add to your range and an opportunity for new customers in the powder industry. We strongly encourage you to seek out BFM® distributors and other companies in the powder industry who will instantly see the value of this product.

Some of the typical powder industries are battery, grain, wheat, cereals, flour, dairy, coffee, pasta, salt, sugar, supplements, additives, minerals, cosmetics, pharmaceuticals, pet food, chemicals, detergents, inks, paints, building products, compounding, polymers, rubber and recycling. There are many more!
